Andy Fraysse	2779 Sherwood Drive Navarre	Building Heights
Phil Babiak	8510 Navarre Parkway	
Harold A. Webb	5528 Willard Norris Road Milton	Stay within the Comp Plan
Patrick J. Traynor	NOT PROVIDED	
Linda Wagoner	7740 Gulf Boulevard Navarre	What is the URL website address Will you outline the 100' multi-family zone on the sound by identifying landmarks?

## Final Recommendation Comment Log

Name	Address	EMAIL	Comments
Will Smith	6948 Cotton Ball Lane	<a href="mailto:NavarreIsland@yahoo.com">NavarreIsland@yahoo.com</a>	A billboard sign on Rte 98 says "Pullum Realty- Building Navarre." It should say, "Selling Navarre." It's right that an owner should be able to sell their property, but not to use their influence and money to get the Planning & Zoning Board and the Commissioners to change the existing Comprehensive Plan to suit their buyers' needs. I would like the majority of residents to decide what happens in Navarre-- not a favorite few. The Town Plan sounds good, but please don't let the "richer minority" "rule" over the wishes-- and the plan that is in place-- of the majority. We aren't rich, but we live here too, unlike the builders, and we want to raise our kids here too. P.S. Put the higher buildings in Milton, not Navarre.
Enid Sisskin	4172 Madura Four Gulf Breeze	<a href="mailto:esisski@mchsi.com">esisski@mchsi.com</a>	I am absolutely opposed to raising building heights. This will be precedent setting and pave the way for higher density development all along the peninsula and into the rest of the County. Our infrastructure is already stressed. The roads are crowded, the schools are crowded and our quality of life is at risk. I'd like to give the County Commission clear direction, no high rises anywhere.
Albert T. Hunt	7690 Martha's Way Navarre	<a href="mailto:althudhunt@aol.com">althudhunt@aol.com</a>	The proposal to increase building heights from 50' to 100' is outrageous and should stay as is. Note: At the start of this process I had signed up for one of the committees and because they were not well advertised I missed the first two meetings. As a result when I showed up at the third I was told that I was not needed as they had enough people. Each segment being made up of developers, real estate and so on. You allowed the developer to set the currently proposed building heights @ 100' (talk about putting the fox in charge of the hen house). As he is not a resident of Santa Rosa County, he should have been allowed as a <b>spectator only</b> . He is still a voting resident of the State of Georgia.
Trudy Hunt	7690 Martha's Way Navarre		The proposal to change the height of current buildings should NOT be changed. We do not want any taller buildings than we already have. In N.C. buildings are no higher by the beach than four stories by the beach mile after mile etc... and it keeps the beauty and "flavor" of the beaches!!
